Field of the Invention The invention relates generally to the field of well bore hydrocarbon fluid production, and more particularly to systems and methods for recovering methane gas from a well bore hydrocarbon fluid production stream. 2. Background of the Invention In the oil and gas industry, it is desirable to extract oil from oil bearing formations or reservoirs that exist below the earth's surface and bring the extracted oil to the surface for collection, processing, and transport to oil refineries or other locations. The most common method for extracting oil from subterranean reservoirs is by utilizing the natural pressure that exists within the reservoir to force the oil to the surface. In this method, referred to as ♦ 82157476af
